Mastering the art and skill of Contact lens fitting in complex cases

Contact lens fitting for patients who have undergone corneal surgery and those with irregular Corneas has always been a challenge for Contact lens practitioners in view of the possible existence of eye diseases/disorder, degeneration or after effects of surgery.

Contact lens fitting for such patients hence demands a thorough understanding of the case and utmost skill on the part of the Contact lens practitioner. Having a thorough knowledge and skill in fitting Contact lens in irregular corneas is undoubtedly a feather to your cap and would certainly attract more patients to your practice.

Special highlights of this workshop are live demonstration of different contact lens fitting, analyzing real case examples and Case discussion.
